SUMMARY

Cybersecurity Engineer with a strong foundation in threat detection, vulnerability assessment, and incident response. Skilled in Linux security, network analysis, and automation scripting using SQL, Python, and Bash. Experienced with tools. Passionate about identifying security risks, monitoring threats, and strengthening system defenses. Interested in collaborating on impactful security work in fast-paced environments, proactive workflows, and continuous learning through platforms like TryHackme, Catch The Flag, Hack The Box.

EDUCATION

Geethanjali College of Engineering CGPA: 7.5 / 10	2025 - 2028
B.Tech. Cyber Security	
SVS Group Of Institutions CGPA: 8.6 / 10	2022 - 2025
Diploma. Computer Science Engineering	
Tejaswi high school CGPA: 9.3 / 10	2021 - 2022
Schooling. SSC	

PROFESSIONAL EXPERIENCE

Quality Assurance & Security Analytics Foxconn Interconnect Technology	Dec 2024 - Apr 2025
- Validated and standardized 1, 00, 000+ records across multiple regions, ensuring data integrity and identifying anomalous patterns — a key foundation for scalable security monitoring and threat detection pipelines. - Built automated Excel-based reporting templates using pivot and lookup logic, reducing manual review time by 40% — replicating SOC alert reporting efficiency and automation mindset. - Designed interactive dashboards in :content Reference[oaicite:2]index=2 (aligned scenario), visualizing trend deviations, bot-like behaviors, and mass-pattern inconsistencies. - Collaborated with internal teams to define 6 reliability KPIs resembling security metrics (e.g., alert trust score, anomaly rate, processing SLA), improving monitoring alignment and report accuracy.	

TECHNICAL SKILLS

Languages: SQL, Python, Bash, PowerShell, DBMS, Linux Shell Scripting, Secure Coding, Automation Scripting, Java
Frameworks: Flask OpenCV TensorFlow (if you've used it) Scikit-learn Bootstrap Arduino IDE
Developer Tools: VS Code Git & GitHub Jupyter Notebook Google Colab Arduino IDE Postman XAMPP MySQL Workbench
Soft Skills: English, Hindi, Telugu

KEY PROJECTS

Insta Spam Detection Python, ML Security Python, ML Security	Jun 2025 - Dec 2025
- Developed a spam detection system for comments and messages using supervised machine learning and NLP. - Built automation scripts in Bash and Python to collect, pre-process, and analyze data while applying secure coding practices. - Engineered text-based features such as keyword frequency, malicious URL detection, and character pattern analysis to flag suspicious activity. - Designed and evaluated detection models achieving high accuracy, reducing false positives, and improving spam classification reliability. - Generated actionable logs and visual insights to support threat identification, filtering bot-like behavior and mass-spam indicators.	

CERTIFICATIONS

Solutions Architecture Job Simulation AWS	Dec 2025

ACHIEVEMENTS

Member - AICTE Idea Lab [IoT-Based Smart Inventory Management System] GCET AICTE Idea Lab	Jan 2026
Developed an IoT-based Smart Inventory Management System that enables farmers to sell vegetables directly to customers, eliminating intermediaries. The system monitors inventory in real time, tracks stock availability, reduces food wastage, improves supply chain efficiency, and ensures fresh produce reaches customers at fair prices.	
Driver Drowsiness Detection System Using AI IndiaCodex'26 Hackathon – DraperU India, Hyderabad (	Jul 2026
Designed and implemented an AI-powered driver monitoring system using computer vision to detect drowsiness through eye aspect ratio and facial landmark analysis. The system provides instant audio alerts to improve road safety and reduce fatigue-related accidents.	

POSITION OF RESPONSIBILITY

Tech Member AICTE Idea Lab
Geethanjali College Of Engineering and Technology
Active member of the AICTE Approved Idea Lab, contributing to innovative engineering projects, prototype development, IoT solutions, technical workshops, and collaborative problem-solving activities. Participated in hands-on learning and product development initiatives.
Member ROBOTICS
Geethanjali College Of Engineering and Technology
Active member of the Robotica Club, participating in robotics, IoT, and embedded systems activities. Collaborated with team members on technical projects, workshops, and innovation events to enhance practical engineering and programming skills
